New Opportunities (Phase 5, Priority 2)

16 new, quality-checked options, one upgraded entry, and the ones checked and rejected. 7 November 2026

How these were checked: each item was checked against your verified profile:

- CGPA **2.62/4.00**; final year **3.20**; Years 4–5 **2.98**
- Ethiopian citizen
- BSc Computer Science, 2022, taught in English
- Fintech infrastructure experience (pending HR letters)

Evidence codes:

- **E1:** read on the official site
- **E2:** official site found by search but not opened here (open it in your browser before acting)
- **E3:** secondary source only

Labels:

- **A:** strong and realistic
- **B:** possible, needs evidence
- **C:** low probability
- **D:** not eligible

None of the new items reaches A. The honest picture: most fully funded master's routes outside your current portfolio require a GPA of 3.0 or "upper second class", so the realistic new options are the ones that weigh **work experience, nomination or need** alongside grades.

Funding words used exactly:

- **Full:** tuition + living + travel + insurance
- **Tuition + stipend:** living costs may be partly covered
- **Partial:** tuition only, or a small stipend

Türkiye Burslari	75% academic minimum not met (see P1)	E1

6. What changes in your plan

1. **Third Erasmus Mundus slot:** add **SMACCs** (deadline 1 Feb 2027). Its score includes work experience, unlike EDISS. Erasmus Mundus allows at most three applications in a cycle: AISS + EDISS + SMACCs.
2. **Add ICCR (India) to the 2027 plan.** It is fully funded, Ethiopia has a large quota, and admission depends on Indian universities rather than a fixed scholarship GPA.
3. **Watch three calls in November and December:**
    - VLIR-UOS country and programme list
    - CSC Ethiopia call
    - Brunei call
4. **Calendar for 2027:**
    - IYT Italy (spring)
    - Japan MEXT embassy route (spring)
    - University of Rwanda Mastercard Foundation (July)
    - Czech Government (Aug–Sep)
    - Australia Awards (from Feb 2027, for 2028)
