# Discrepancy Resolution Report

## Phase 3: Applicant Verification

Version 1.0, 5 November 2026 (26 Tikimt 2019 EC)

## 1. Purpose and rules

This report lists every conflict found across your documents and says, for each one:

- which source carries the most weight
- what evidence would settle it
- what only you can confirm
- the information we will use, either verified now or pending your confirmation

**Rules applied:**

1. I never pick the version that looks better. Where documents conflict, the field stays **PENDING** until primary evidence (registrar or HR document) or your written confirmation settles it.
2. **Authority ranking** (strongest first):
    1. Official institutional document (registrar transcript or certificate; signed HR experience letter, contract or payslip)
    2. Third-party verification (certification verification page, official correspondence)
    3. Your written confirmation
    4. Your own CVs and LinkedIn, which are self-declared and lowest
3. **Status labels:**
    - **RESOLVED (document):** settled by an institutional document
    - **RESOLVED (calculation):** settled by arithmetic on an institutional document
    - **PENDING (evidence)**
    - **PENDING (your confirmation)**
    - **EXCLUDE:** not to be used in any application unless new evidence appears

## 2. Documents examined (Google Drive, read 5 Nov 2026)

| Code | Document | Drive date | Type |
|---|---|---|---|
| D1 | Temporary Certificate of Graduation + Student Academic Record, Debre Tabor University | Mar 2026 upload | **Institutional (registrar)** |

| Code | Document | Drive date | Type |
|---|---|---|---|
| | (generated 15 Jul 2022) | | |
| D2 | Europass CV “Nebyu_DevOps_Cv.pdf” | 7 Aug 2026 | Self-declared |
| D3 | Europass CV “Nebyu_Dejenie_DevOps_Engineer.pdf” (**newest**) | 12 Aug 2026 | Self-declared |
| D4 | “nebyu.resume.pdf” (Enhancv) | Dec 2025 | Self-declared |
| D5 | “Resume_Nebiyu.pdf” (content written about Nov 2023 to Feb 2024) | 2024–2025 | Self-declared |
| D6 | Letter of Recommendation, [former lecturer, name withheld] (MSc), Lecturer, SITE, DTU, dated 4 Nov 2024 | Mar 2025 | Third party (unsigned copy?) |
| D7 | Berhan Bank letter, 16 Feb 2023: recommends **SantimPay Engineering PLC** (the company) | Feb 2024 | Third party, about the company |
| D8 | Amhara Bank letter, 7 Feb 2024: recommends **SantimPay Financial Solutions S.C.** (the company) | Feb 2024 | Third party, about the company |
| D9 | Cooperative Bank of Oromia letter, 22 Oct 2020: recommends **Santim Pay Engineering PLC** (the company) | Feb 2024 | Third party, about the company; predates your employment |
| D10 | GAO Tek Inc. unpaid internship acceptance terms | May 2023 | Agreement (unsigned image) |

| Code | Document | Drive date | Type |
|---|---|---|---|
| | (start 15 Mar 2023, 45 h/week) | | |
| D11 | “Intent letter.pdf” to “Admissions Committee, PICA Cineca Italy” | Dec 2024 | Self-written statement |
| D12 | SantimPay HR letter SP/1653/2025 (8 Dec 2025) | Dec 2025 | **Concerns another person ([another person] Dejen, driver). Not your evidence. EXCLUDE** |

Not opened: the Passport folder (sensitive). Only the name spelling and expiry date are needed.

## 3. Discrepancy register

### DR-01: Cumulative GPA (2.62 vs 2.67). CRITICAL

| Item | Detail |
|---|---|
| Conflict | You reported **2.67**. D1 shows final “Cumulative Average: **2.62**” with totals **627.75 grade points / 240 credits**. |
| Found in | D1 (registrar). No document shows 2.67. |
| Most authoritative | **D1** |
| Calculation | 627.75 ÷ 240 = **2.6156** → **2.62**. The last two semesters add up correctly: 554.00 + 73.75 = 627.75. The 240 credits reflect failed attempts replaced by retakes (245 attempted). |
| Why it matters | The Korea GKS cut-off is **2.64**. Every application must quote the same figure as the transcript. |
| Evidence that could change it | A printed diploma, or a newer official transcript issued by the DTU registrar, showing a different CGPA |
| Needs your confirmation | Where 2.67 came from (memory, another document, a different calculation?) |
| **Final verified value** | **CGPA 2.62 / 4.00 (RESOLVED, document).** It stays 2.62 unless a newer registrar document says otherwise. |

## DR-02: Study start date and calendar. MODERATE

| Item | Detail |
|---|---|
| Conflict | D2/D3: “14/07/2018 – 14/07/2022”. D4: “09/2018 – 07/2022”. D5: “Sep 2018 – Jul 2022”. D1: first courses in **“Semester 1, AcYear 2017/2018, Year 1”**; final semester “AcYear 2021/2022, Year 5”. |
| Most authoritative | **D1** |
| Calendar analysis | D1 uses the **Gregorian** calendar. Ethiopian year 2017 EC runs Sep 2024 to Sep 2025, after you graduated, so the academic years cannot be Ethiopian. Award date 14 Jul 2022 GC = **7 Hamle 2014 EC**. AcYear 2017/18 GC corresponds to **2010 EC** (1 Meskerem 2010 = 11 Sep 2017). The student-ID suffix on D1 is consistent with a 2010 EC intake, but this is an inference only. |
| CV error | “14/07/2018” is exactly the graduation date minus four years. It is not a real start date, and the programme ran across **five** academic years (Year 1 to Year 5). |
| Evidence required | The start month: registrar admission record, ID card or first-semester registration slip |
| Needs your confirmation | The month and year your first semester began |
| **Final verified value** | Study period **AcYear 2017/2018 to July 2022 (RESOLVED, document)**. Exact start month **PENDING (your confirmation)**. |

## DR-03: Programme description. LOW

| Item | Detail |
|---|---|
| Conflict | D2/D3 say “Level in EQF: 5”. A bachelor’s degree is **EQF level 6**. D1 shows “Admission Classification: Extension”, which no CV mentions. |
| Most authoritative | D1 |
| Action | Correct the level to EQF 6 (or delete the line). Describe the degree as **“BSc in Computer Science (Extension programme, 5 academic years)”** where a form asks for study mode. Do not hide the study mode: evaluators see it on the transcript. |
| **Final verified value** | **BSc Computer Science, Faculty of** |

| Item | Detail |
|---|---|
| | **Technology, Debre Tabor University, Debre Tabor, Ethiopia; Extension programme; awarded 14 Jul 2022; medium of instruction English (RESOLVED, document).** |

## DR-04: University name and references. LOW

| Item | Detail |
|---|---|
| Conflict | D1: "Debre Tabor University, Faculty of Technology, Department of Computer Science". D6: "School of Information Technology and Engineering (SITE)". The CVs use "Debre Tabor University". |
| Assessment | Not a real conflict: the faculty and school naming may differ by year. Use the faculty and department as printed on D1. |
| **Final verified value** | **RESOLVED (document)** as above. |

## DR-05: Name spelling. HIGH (administrative)

| Item | Detail |
|---|---|
| Conflict | D1: NEBYU DEJENIE TILAHUN. D2/D3: Nebyu Dejenie. D5, LinkedIn, website and email: "Nebiyu". |
| Most authoritative | **Passport** (governs visas and offer letters), then D1 |
| Evidence required | The passport name line |
| **Final verified value** | **PENDING (your confirmation).** Every application will use the passport spelling. If it differs from D1, a "one and the same person" declaration may be needed. |

## DR-06: SantimPay, job title(s) and dates. CRITICAL

| Document | Title | Dates |
|---|---|---|
| D5 (about Nov 2023 to Feb 2024) | Cloud Infrastructure and Monitoring Engineer | **Aug 2022 – Oct 2023** |
| D4 (Dec 2025) | Technical POS Manager ("Leading POS systems… led nationwide merchant onboarding") | **10/2022 – Present** |
| D4 (summary) | "IT Operations Specialist at SantimPay" | not stated |

| Document | Title | Dates |
|---|---|---|
| D2 (7 Aug 2026) | DevOps Engineer | **18/08/2022 – Current** |
| D3 (12 Aug 2026) | DevOps Engineer | **06/01/2025 – Current** |

| Item | Detail |
|---|---|
| Analysis | Four documents agree you **joined SantimPay around August 2022**: D5 “Aug 2022”, D2 “18/08/2022”, and the Plan International entry in D4 “08/2022” (see DR-08). D4’s “10/2022” may be a typo for **10/2023**: it would match D5’s Oct 2023 end of the cloud role. That is an inference, not evidence. D3’s “06/01/2025” may mark the start of the **DevOps Engineer title**, not of employment. D2 and D3 claim different tools for the same role (Jenkins vs GitHub Actions; Prometheus/Splunk vs Grafana; VMware ESXi vs Proxmox VE for the same “initial configuration” bullet), and D3 adds “AI agents” and “Terraform”. |
| Working hypothesis (NOT verified) | SantimPay from Aug 2022: Cloud Infrastructure & Monitoring Engineer (Aug 2022 – Oct 2023), then Technical POS Manager (from Oct 2023?), then DevOps Engineer (from 6 Jan 2025?) |
| Supporting indirect evidence | Drive holds SantimPay POS working files (POS SIM-card activation sheet, Apr 2026; POS/ATM card sheet for Shoa Supermarket, May 2025), which is consistent with hands-on POS operations work. The bank letters D7–D9 confirm SantimPay’s business (POS terminal management and monitoring, QR merchant acquiring, school payments, payment gateway, loyalty/gift cards) but **say nothing about you**. |
| Most authoritative | **A SantimPay HR experience letter** listing each title with start and end dates and full-time status |
| Evidence required | HR experience letter (signed, stamped); optionally the employment contract or promotion letters |
| Needs your confirmation | Every title held, with dates; which tools you actually used in each period; whether “led |

| Item | Detail |
|---|---|
| | nationwide merchant onboarding" is accurate, with the team size you led |
| **Final verified value** | Employer **SantimPay Financial Solution S.C., Addis Ababa** (company confirmed by D7–D9). **Titles and dates PENDING (evidence).** |

## DR-07: Kifiya, dates and concurrent employment. CRITICAL

| Document | Title | Dates |
|---|---|---|
| D5 | "IT Ops", described as "my current role at Kifiya" | **Oct 2023 – Feb 2024** |
| D4 | Information Technology Operations Specialist | **02/2023 – 02/2025** |
| D2, D3 | IT Operations Engineer (Hybrid) | **03/09/2022 – 15/09/2025** |

| Item | Detail |
|---|---|
| Analysis | Three incompatible date ranges. The **earliest-written** document (D5) puts the start at **Oct 2023**, and later documents move the start earlier and the end later. In every version, Kifiya overlaps the SantimPay employment. |
| Risk | An employer letter or an SI "proof of work" form signed by Kifiya will show the true dates. Any CV that disagrees with it may be treated as misrepresentation, and that can disqualify an application or cause problems at the visa stage. |
| Most authoritative | **A Kifiya HR experience letter** |
| Evidence required | The letter, stating employment type (full-time, part-time, contract, outsourced to client sites) and exact dates |
| Needs your confirmation | The true dates; how the two jobs ran at the same time (hours per week at each) |
| **Final verified value** | **PENDING (evidence).** Kifiya will not appear on any CV until this is settled. |

## DR-08: "Plan International Ethiopia". CRITICAL: EXCLUDE

| Item | Detail |
|---|---|
| Claim | D4 only: "Cloud Infrastructure and |

| Item | Detail |
|---|---|
| | Monitoring Engineer, Remote, Plan International Ethiopia, 08/2022 – 10/2023" |
| Analysis | The **same title, same dates and word-for-word identical bullet points** appear in D5 under **SantimPay**. This strongly suggests the employer name in D4 is wrong. No contract, letter or other evidence of a Plan International role was found. |
| **Final value** | **EXCLUDE.** It will not appear anywhere unless you provide an official Plan International letter. If it was an error, delete it from LinkedIn and any portal profiles too. |

## DR-09: "Yandex, Odoo Developer". HIGH: EXCLUDE pending evidence

| Item | Detail |
|---|---|
| Claim | D4 only: "06/2025, Remote, Odoo Developer, Yandex", with a broad description of Odoo module development |
| Analysis | Absent from D2 and D3. No contract, invoice, letter or platform record found. |
| Evidence required | A contract or engagement letter, a payment record, or freelance platform history |
| **Final value** | **EXCLUDE** until evidence exists. If it was a short freelance task, it may be listed later as "freelance project" with accurate dates. |

## DR-10: Other engagements not consistently listed. MODERATE

| Engagement | Found in | Issue | Proposed handling |
|---|---|---|---|
| Infonans Solutions PLC, Network Engineer | D2/D3: 19/07/2022 – 31/08/2022. D4: 06/2022 – 09/2022 | Short; dates differ; overlaps the SantimPay start (Aug 2022) | PENDING. List only with a letter or your confirmation. A 6-week role adds little; consider omitting it. |
| Gebeya Inc., Independent Contractor (Junior Web Developer) | D5: "May 2022 – Present (1 year 6 months)" | Absent from 2025–26 CVs | PENDING (your confirmation). List as freelance only if evidence exists. |
| GAO Tek Inc., unpaid remote internship | D10: start 15 Mar 2023, 45 h/week | Not in any CV; 45 h/week alongside full-time work | PENDING (your confirmation): was it completed, and is there a certificate? |
| Dereja: Data | D2/D5: Jan–Feb 2022 | Short programme | Keep as "Dereja |

| Engagement | Found in | Issue | Proposed handling |
|---|---|---|---|
| Analytics Lead – Insights | (before graduation) | role; title may overstate a trainee position | Academy programme: Data Analytics Lead (2 months)" **only if** a Dereja certificate supports it |
| Dereja: Co-Trainer / LMS support | D2: "2022" ("Write here the descriptio…" template text left in). D5: "Aug 2022". D4 headline: "LMS Support Specialist" | Short | Valid community or training contribution if confirmed. Fix the template text. |

## DR-11: Total professional experience. HIGH

| Item | Detail |
|---|---|
| Conflict | Your figure: **3 years 6 months**. D3: "4 years". D4: "over two years" (2025). D5: "recent graduate". |
| Analysis | If SantimPay employment has been continuous since Aug 2022, experience to Nov 2026 is about **4 years 3 months**. 3 years 6 months would fit a start around May 2023, or periods of part-time work. |
| Rule | Experience will be stated only as **dated periods taken from employer letters**. Totals are calculated from them, never estimated. |
| Scholarship thresholds | SI: ≥ 3,000 h from at most 3 employers. Chevening: 2,800 h. EPOS: 2 years. Any truthful version of your history meets all three. Inflating it gains nothing and risks everything. |
| **Final value** | **PENDING (evidence).** |

## DR-12: Certifications. MODERATE

| Claim | Issue | Evidence required | Handling |
|---|---|---|---|
| Certified Kubernetes Administrator (Linux Foundation), "issued July 2022, expires July 2025" | Issued the same month you graduated. Expired. No verification ID in any CV. | Linux Foundation certificate ID / verification link | List as "CKA (Jul 2022 – Jul 2025, expired)" **only with an ID**; otherwise omit. Re-certifying would be a strong signal. |

| Claim | Issue | Evidence required | Handling |
|---|---|---|---|
| Azure Fundamentals (May 2021) | No ID | Microsoft Learn transcript link | List with the link |
| Fortinet NSE 1–3 (Jun 2023, expired Jun 2025) | Entry-level awareness certificates | IDs present in CV | List as expired, or omit |
| IBM "Technical Sales Intermediate" badges (expired 2024) | Sales-track badges, little technical weight | Credly | Omit from academic CVs |
| ISO 9001 (D4 only) | No evidence | Certificate | EXCLUDE unless provided |
| Udemy / LinkedIn Learning / Alison / virtual experience programmes | Course-completion certificates, **not certifications** | Links | List under "Training", never under "Certifications" |

## DR-13: Technical claims that changed between CV versions. HIGH

D3 (12 Aug 2026) adds or changes claims compared with D2 (7 Aug 2026), five days earlier:

- "GitHub Actions" replaces "Jenkins"
- "Grafana" replaces "Prometheus/Splunk"
- "Proxmox VE" replaces "VMware ESXi" in the same "initial configuration and deployment" bullet
- adds "Terraform", "n8n" and "Deploy and manage AI agents"
- "Lead infrastructure-level incident troubleshooting" replaces "Conducted"

**Handling:** keep only tools you can **demonstrate in an interview** and that a referee or employer letter can support. Where you used both (for example Jenkins earlier, GitHub Actions later), list both with periods. "Lead" requires that you actually led incidents. **PENDING (your confirmation)**, item by item, in the Achievement Evidence Worksheet.

## DR-14: Recommendation letter ([former lecturer, name withheld], 4 Nov 2024). HIGH: do not reuse

| Issue | Evidence |
|---|---|
| Overstates performance | Calls you a "high-performing student" who "excelled" in Fundamentals of Database and Networking. D1 grades: **Fundamentals of Database C+**; **Data Communication & Computer Networking C**. A reader comparing the letter with the transcript will notice. |
| Template or content error | Paragraph 3: "In Computer Science, which covers software design, verification, and validation…". This names a degree, not a |

| Issue | Evidence |
|---|---|
| | course, which suggests a reused template. |
| Generic | Addressed “To Whom it May Concern”; no programme named; no specific example or comparison with peers |
| Format | Copy found in Drive; no visible signature or letterhead in the text extract |
| Usability | CMU-Africa, Erasmus Mundus and SI all collect references **directly from referees** through portals or on their own templates (SI: 2027/28 template, signed and stamped). An old uploaded letter is not accepted for these. |
| **Decision** | **Do not use.** Ask referees to write new letters themselves, supported by an accurate briefing pack (10_RECOMMENDATIONS). I will not write a letter for a referee to sign. |

### DR-15: Earlier statement of intent (Italy, Dec 2024). LOW: lesson learned

D11 contains unfilled placeholders (“[Your University Name]”, “[Graduation Year]”). It addresses “PICA Cineca”, which is an application platform, not a university. It also claims you were “excelling academically” and “actively participated in research projects”, which the transcript and CVs do not support. **Do not reuse.**

**Needs your confirmation:** was it submitted anywhere? If it was, future statements must not contradict it, and it will help to know the outcome.

### DR-16: Document about another person in the same Drive. ADMIN

D12 (SantimPay HR letter, 8 Dec 2025) and “[another person's CV file]” concern **another person**. They play no part in your application. Keep them in a separate folder so they are never attached by mistake.

## 4. Summary of the final verified record (as of 5 Nov 2026)

| Field | Verified value | Status |
|---|---|---|
| Name (academic record) | NEBYU DEJENIE TILAHUN | Verified (D1); passport match pending |
| Degree | BSc Computer Science, Debre Tabor University (Faculty of Technology); Extension programme | Verified |
| Award date | 14 Jul 2022 GC = 7 Hamle 2014 EC | Verified |

| Field | Verified value | Status |
|---|---|---|
| Study years | AcYear 2017/18 to 2021/22 (5 academic years) | Verified; start month pending |
| CGPA | 2.62 / 4.00 | Verified |
| Final-year semester averages | 3.05 and 3.35 | Verified |
| Medium of instruction | English | Verified |
| Employer 1 | SantimPay Financial Solution S.C. (fintech; POS, QR, payment gateway, school payments) | Employer verified; titles and dates pending |
| Employer 2 | Kifiya Financial Technology PLC | Pending |
| Plan International; Yandex | n/a | **Excluded** |
| English test | None | Required for most programmes (not Sweden) |

## 5. What blocks the CV and essays

**BLOCKING items (must be resolved before any CV or essay is final):**

- DR-05 (name)
- DR-06 (SantimPay)
- DR-07 (Kifiya)
- DR-11 (total experience)
- DR-13 (technical claims)

**Not blocking:**

- DR-01, DR-02, DR-03, DR-04 are resolved, apart from the study start month.
- DR-08 and DR-09 are excluded.
- DR-12, DR-14, DR-15 and DR-16 are handled as described above.
